Front Accounting User Guide Manual.pdf

3. INTRODUCTION:

Front Accounting (FA) is a professional web-based Accounting system for Enterprises Resource Planning (ERP). It is developed in PHP / Ajax using MySQL management system. It is targeted towards small and medium sized enterprises. It is integrated with modules that support most common business processes. Front Accounting is a multi-user system. It supports multiple languages and currencies. Front Accounting is developed by an international team. Senior developer Joe Hunt from Sweden and Janusz Dobrowolski from Poland.

4. TEST ITEM:

a) Login:-

In the login page the users have to login using your valid user id and password. Multiple users can login into system.

b) Sales:-

In the sales module, the seller/salesman can setup a quotation entry and after that it can be convert into sales order entry if there is an order for product from customer's side. Then the salesman can make a delivery entry for the products which is been dispatched to customer along with an invoice entry. After the customer does payments the salesman can make a customer payment entry in the system for the same

c) **Purchases:-**

In the purchase module, the Buyer makes a purchase order entry in the system for the products he/she ordered to a supplier. Then buyer can make goods receive entry for products that has been delivered from supplier along with a Page 1 / 8supplier invoice entry. Then the buyer can make a supplier entry after paying the desired amount for the products they received.

d) **Items and Inventory:-**

In the Item and Inventory module, here the stockist/inventory manager maintain the goods/products which are allocated at different warehouses in different locations. Here they maintain the record of goods transferred from one location to another location with a specific date . Here they also maintain the status of each products at different location warehouses and the transaction details of each products with a specific date range/duration.

5. **FEATURES TO BE TESTED:**

a) Login:-

i. User login

b) SALES:-

i. Sales Quotation Entry
ii. Sales Order Entry
iii. Delivery for sales order
iv. Invoice for delivery note
v. Customer payment

c) PURCHASE:

i. Purchase Order Entry
ii. Receive purchase order items(GRN)
iii. Supplier Invoice Entry
iv. Payment to Supplier

d) ITEM AND INVENTORY:-

i. Inventory Location Transfer
ii. Inventory Item Movements
iii. Inventory Item Status

6. FEATURES NOT TO BE TESTED:

I. Manufacturing
II. Fixed Assets
III. Dimensions
IV. Banking and General Ledger
V. Setup

7. TEST APPROACH:

a) method of testing :
i. Black-Box testing method
ii. Smoke Testing

b) Levels of testing:
i. System Integration testing (SIT)
ii. Regression Testing

c) Type of testing:
i. Functional testing
ii. Compatibility testing
iii. Security testing
iv. Performance testing
v. Cross Browser Testing in (Chrome & Firefox)

8. TEST DELIVERABLES:

Test Plan
Test Scenarios
Test Cases
Defect Summary Report / Daily Status Report
Issue Logs

9. TEST ENVIRONMENT:

Hardware :

RAM	8GB
PROCESSOR	INTEL I5 CORE PROCESSOR WITH 3GHZ
OPERATING SYSTEM	Windows , Linux
SERVER	Apache Tomcat
BROWSERS	Google chrome,Mozila Firefox

SOFTWARE:

PDF READER	Adobe pdf Reader
JIRA	Defect Tracking Tool

10. SCHEDULE:

SR.NO	TASK /ACTIVITIES	DAYS	DATE RANGE
1	TEST PLAN WRITING	1	12/10/2026
2	TEST SCENARIOS WRITING	3	13/10/2026 - 15/10/2026
3	TEST CASE WRITING	3	16/10/2026 - 20/10/2026
4	TEST CASE EXECUTION & DEFECT REPORTING	3	21/10/2026 - 23/10/2026

11. ROLES AND RESPONSIBILITIES :

SR.NO	NAME OF THE PERSON	DESIGNATION	TASK/ACTIVITIES
1	MANSI JADHAV		
2	NILAM YADAV		
3	URMILA PATIL		
4	MANGAL BHALDARE		
5	RAJNEESH SHUKLA		
6	AKSHAY SOLANKI		

12.STAFFING AND TRAINING:

TRAINING CONDUCTED BY	TRAINING CONDUCTED FOR	TRAINING TOPIC

13.WARE RISK ISSUES (Product risk):

- Non-Availability of Test automation tools to test
- Non availability of functionally skilled testers to test the functional product
- Non availability of training on the product to the testers

14.RISK AND CONTINGENCIES (Project risk):

- Non-availability of complete “Test Basis”
- Delay in receiving the build from Development team
- Lack of required testing resources to complete the test on time

15.SUSPEND AND RESUME CRITERIA:

Suspend Criteria

1) Show stopper defect found (Blocker defect)
2) Power Outages
3) System has crashed

Resume Criteria

1) Show stopper defect is resolved and retested
2) Power issue is resolved
3) System (Hardware/Software) is fixed and can be resumed

16.EXIT CRITERIA:

1) All the Test Cases should be executed (with 100% Test Coverage)
2) All the Test cases should be with Pass status post test execution.
3) Code for all Failed testcases should be fixed / Retested and closed.
4) Required quality of product (software) should be achieved.
5) All the Test Deliverables should be Updated with latest content

17.APPROVAL:

Sr no.	Name of person	Designation	Date	Remark	Signature
